

The radio station K-LOVE is the primary station that I listen to at work and at home and while driving in my car. I grew tired of listening to angry men discussing politics or music that is full of violence, profanity, and immorality. What a refreshing change K-LOVE has been! It also provides good news along with the bad. Sometimes it is overwhelming listening to only the bad things that are going on in the world. Please do not do anything that would lessen the broadcasting power of this station. I wish we could get it in the remote areas as well. Can it's range be increased?
